

FROM STORMWATER ELEMENT:

STORMWATER MANAGEMENT UTILITY PROGRAM

Objective 1.3: [SM] (Rev. Effective 12/10/91)

By 1992, form a unified stormwater management program to provide regulatory, capital improvement, planning, operation, and maintenance functions to control stormwater quantity, rate and quality.

Policy 1.3.1: [SM] (Rev. Effective 12/10/91)

The City and County shall have a coordinated stormwater program which may have individual territorial responsibility and administrative functions for the Stormwater Management Utility Program.

Policy 1.3.2: [SM] (Rev. Effective 12/10/91)

Funding for the stormwater utility shall be generated by:

- 1) Equitable user charges;
- 2) Impact and system availability connection fees;

III-24 Utilities

- 3) Grants;
- 4) Ad valorem taxes;
- 5) Other sources.

Policy 1.3.3: [SM]

Funding for the stormwater utility shall be generated by:

- 1) Equitable user charges to owners of property contributing runoff;
- 2) Impact and system availability connection fees;
- 3) Grants;
- 4) Special overlay district;
- 5) Other sources;
- 6) Any combination of the above

Policy 1.3.4: [SM] (Effective 7/16/90)

By 1992, local government shall have adopted operating policies and procedures which shall clearly define local government's responsibility and procedures relating to the following matters:

- Scope of operation and maintenance activities and service areas
- Acceptance of dedicated facilities
- Methodology for computing user and other charges
- Engineering and pollution control design criteria
- Connection permit and enforcement procedures
 - Master stormwater/drainage management system planning, funding and construction
 -

STORMWATER MANAGEMENT PLAN

Objective 1.4: [SM] (Rev. Effective 12/10/91)

A comprehensive stormwater management plan for the entire county shall be adopted by 1994.
